EDUCATION

2026 - Present

B.TECH - Artificial Intelligence & Data Science

Nadar Saraswathi College of Engineering & Technology - Theni

AWARDS & CERTIFICATIONS

- IIT Madras E-Summit '26 Exhibitor
- IoT & Hardware Systems Integration
- Full-Stack Development

TECHNICAL SKILLS

- **Programming** : Python, Java
- **Frontend** : HTML 5 , CSS 3 , JS , React v19.0
- **Backend** : Python - Flask , FastAPI , Java
- **Database** : PostgreSQL , MongoDB , Firebase
- **AI/ML** : OpenCV , Tensorflow , Numpy , Pandas , Scikit-Learn

SUMMARY

I am an ambitious Engineering Student and Full-Stack Developer focused on building smart solutions using React 19, Python, and IoT systems. I specialize in integrating Generative AI models like LLaMA 3.1 into practical applications, including my project TN StudyMate. A proactive problem solver, I demonstrated my technical and pitching skills by showcasing my product to investors at the IIT Madras E-Summit-26.

PROJECTS

• TN StudyMate :

Full-Stack AI-Driven Educational Platform

Currently developing an educational ecosystem using React 19 and Three.js to build immersive 3D dashboards. The platform is being integrated with LLaMA 3.1 via Groq API for real-time AI tutoring, alongside a custom Python-based Weighted Scoring Algorithm for career branch recommendations. With a secure Firebase backend in progress, the system aims to deliver a seamless, scalable end-to-end learning experience.

• EduSync :

AI-Powered Learning Management System

Collaborating as the Lead Backend Developer on an AI-integrated LMS, architecting a robust server-side using Python-FastAPI. I am currently building the core infrastructure to support LLM-based automated grading and real-time voice recognition labs. My role involves managing a flexible MongoDB data schema and implementing a WebSocket-based collaboration suite to power real-time analytics dashboards for institutional oversight.
